SUMMARY

Software engineer with production experience owning code from design through deployment and on-call operations, having shipped scalable microservices processing 50M+ daily records at a top-5 European bank. Proficient in Java, Python, and TypeScript with hands-on AWS, SQL/NoSQL, CI/CD, and GenAI-assisted development. AWS Certified AI Practitioner seeking SDE roles building fault-tolerant distributed systems at scale.

EDUCATION

University of California, San Diego <i>Masters in Data Science (GPA 3.92)</i>	San Diego, CA Sep. 2024 – Jun 2026
College of Engineering Guindy <i>B.E in Computer Science and Engineering (GPA 3.98)</i>	Chennai, IN Aug. 2019 – Apr 2023

EXPERIENCE

Software Engineer <i>Dreamline AI</i>	Aug 2026 – Present San Jose, CA
- Blocked 100% of premature project closures by designing a milestone state machine and PostgreSQL migration - Cut bid lifetime from 4+ months to 48 hours by designing TTL and PII masking in Supabase - Delivered passwordless inspector onboarding on Supabase, passing all 7 acceptance criteria across 20+ QA cases	
Graduate Instructional Assistant <i>UC San Diego</i>	Sep–Dec 2025, Mar–Jun 2026 San Diego, CA
- Decreased manual grading by 65% for 200+ students using a Python autograding pipeline on a Spark cluster - Recovered 3 hours per assignment by diagnosing failing distributed Spark jobs across scalable-analytics coursework - Cut regrade requests 30% across 50+ students using reusable R scripts for statistical modeling	
Software Engineer <i>Société Générale</i>	Jul 2023 – Aug 2024 Chennai, IN
- Eliminated 100% of manual alert triage via Foundry dashboards classifying 5M+ daily records into severity tiers - Accelerated daily AML batch ETL 40% via Spark transformations and Parquet partitioning on AWS S3 & Hadoop - Migrated 50M+ records with 0 data loss by leading design reviews for 7 AML datasets to Palantir OSv2. - Cut policy lookup time 60% by building a full-stack internal platform with Java, JavaScript, and REST APIs - Served 100+ compliance stakeholders with real-time endpoints via Java Spring Boot services on Jenkins pipelines - Resolved 95% of production defects by diagnosing backend issues and providing hands-on support across the SDLC - Shipped 30+ features and bug fixes across release cycles via hands-on coding in Java Spring Framework - Reduced release deployment errors 35% by automating build and test stages for backend components in Jenkins	

PROJECTS

HemsHappen: RAG Medical Chatbot <i>LangChain · FAISS · QLoRA · SentenceTransformers</i> Link
- Built RAG pipeline with FAISS and Claude Sonnet over curated GI guidelines, validated by gastroenterologists - Fine-tuned Med42-8B via 4-bit QLoRA on a red-flag/triage task, improving F1 4.2 pts & schema validity to 95.6%
SplitRight: Expense Splitting PWA <i>Next.js 14 · REST API · PostgreSQL · JWT · PWA · Docker</i> Link
- Built full-stack expense-splitting PWA with Next.js 14, Node.js, and PostgreSQL, deployed via Docker on Vercel - Achieved 90% test coverage across 3 split modes by implementing unit and integration tests with Jest

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, C/C++, R
Frameworks: React, Next.js, Node.js, Spring Boot, FastAPI, Flask, LangChain
Data & ML: Apache Spark, Hadoop, Prophet, RAG, FAISS, QLoRA
Cloud & DevOps: AWS (S3, EC2), Palantir Foundry, Docker, Jenkins, GitHub Actions, CI/CD
Practices: SDLC, Agile/Scrum, Code review

CERTIFICATIONS

AWS Certified AI Practitioner <i>Amazon Web Services</i> Link	Jul 2026 – Jul 2029
